25 June 2026

Dear Editor of DJMKG,

We are pleased to submit an original article entitled "Governance of forensic dental records" for consideration by Dental Journal (Majalah Kedokteran Gigi).

We confirm that this work is original and has not been published elsewhere, nor is it currently under consideration for publication elsewhere.

In this paper, we report a normative legal and ethical analysis of the hospital governance requirements for forensic dental records in Indonesia. This is significant because it translates general legal duties relating to health information into practical safeguards for dental-record creation, access, disclosure, evidence transfer, and oversight.

We believe that this manuscript is appropriate for publication by Dental Journal (Majalah Kedokteran Gigi) because it contributes to dentistry through an applied analysis of forensic odontology, dental record governance, professional responsibility, and accountable hospital-based dental services.

The manuscript addresses the operational gap between general legal and ethical obligations that apply to medical and dental information and the absence of a hospital-level workflow for forensic dental-record use. Rather than providing a general overview of forensic dentistry, the study maps requirements across record creation, storage, access, disclosure, evidence transfer, and institutional oversight. Its practical contribution is a set of governance controls and policy elements that can support the reliable, lawful, and ethically defensible use of dental records in identification and medico-legal processes.

I also certify that publication of this manuscript is approved by all authors and tacitly or explicitly by the responsible authorities where the work was carried out. This study is a normative legal study based exclusively on publicly available legal and scholarly materials; it did not involve human participants, animals, living cells, individual patient data, or identifiable images. Accordingly, ethical clearance and informed consent were not required. If accepted, it will not be published elsewhere, including electronically, in the same form, in English or in any other language, without the written consent of the copyright-holder.

We are willing to pay the APC and proofreading article fees according to the Dental Journal's policy if our manuscript is declared accepted for publication as follows:

1. Article Processing Charge (APC) = 200 USD[^]
2. Proofreading article = 40USD[^] per 1,000 words

[^]price can change at anytime

We have no conflicts of interest to disclose.

Please address all correspondence concerning this manuscript to me at yessy.andriani@ciputra.ac.id.

Thank you for your consideration of this manuscript.

AUTHOR CONTRIBUTIONS

You do not need to include an Author Contributions section in your manuscript: on submission cover letter, you will be asked for the contributions made by each author, to be selected from the list below. Anyone who has contributed but does not meet the criteria for authorship should be listed in the Acknowledgments section.

Contributor Codes	Contributor Role	Role Definition
A	Conceptualization	Ideas; formulation or evolution of overarching research goals and aims.
B	Data Curation	Management activities to annotate (produce metadata), scrub data and maintain research data (including software code, where it is necessary for interpreting the data itself) for initial use and later reuse.
C	Formal Analysis	Application of statistical, mathematical, computational, or other formal techniques to analyze or synthesize study data.
D	Funding Acquisition	Acquisition of the financial support for the project leading to this publication.
E	Investigation	Conducting a research and investigation process, specifically performing the experiments, or data/evidence collection.
F	Methodology	Development or design of methodology; creation of models.
G	Project Administration	Management and coordination responsibility for the research activity planning and execution.
H	Resources	Provision of study materials, reagents, materials, patients, laboratory samples, animals, instrumentation, computing resources, or other analysis tools.
I	Software	Programming, software development; designing computer programs; implementation of the computer code and supporting algorithms; testing of existing code components.
J	Supervision	Oversight and leadership responsibility for the research activity planning and execution, including mentorship external to the core team.
K	Validation	Verification, whether as a part of the activity or separate, of the overall replication/reproducibility of results/experiments and other research outputs.
L	Visualization	Preparation, creation and/or presentation of the published work, specifically visualization/data presentation.
M	Writing – Original Draft Preparation	Creation and/or presentation of the published work, specifically writing the initial draft (including substantive translation).
N	Writing – Review & Editing	Preparation, creation and/or presentation of the published work by those from the original research group, specifically critical review, commentary or revision – including pre- or post-publication stages.

Sincerely,
