
COPYRIGHT STATEMENT

Title of the manuscript:

Validation of a Modified O'Leary Plaque Index Compared to the Standard OHI-S Among Elementary School Students at SDN Pudukpayung 02, Semarang

To protect the rights and interests of both parties, the Indonesian Institute of Science and Technology Research (IISTR) requires a license that clearly stipulates their rights and the specific rights retained by authors. We grant this license to IISTR on behalf of all authors. IISTR is granted the right of first publication of the manuscript under the CC-BY-SA license and has the right:

- 1) To publish, reproduce, distribute, display, and store the manuscript;
- 2) To translate the manuscript into other languages;
- 3) To create adaptations, reprints, and create summaries, extracts, and/or abstracts of the manuscript;
- 4) To create any other derivative work(s) based on the manuscript, given that no plagiarism/ethical infringement is conducted;
- 5) To include electronic links from the manuscript to third-party material;
- 6) To license any third party to do any or all of the above (with the authors' consent);
- 7) To authorize IISTR to take legal proceedings in the copyright owner's name and on the author(s)' behalf if the author(s)' believe that a third party is infringing or is likely to infringe copyright in the manuscript.

The authors hereby grant the license of the above rights to the IISTR Editorial Office, particularly the editor of **Journal of Public Health Sciences** , effective if and when the paper is accepted for publication.

This manuscript contains works that have not previously been published or are not under consideration for publication by other journals. Everyone who is listed as an author in this manuscript has made a substantial, direct, intellectual contribution to the work and should take public responsibility for it.

Sincerely,

Corresponding author: Bambang Sutomo
