Subject: Submission of manuscript of “The Association between Diaphragmatic Thickness and Pulmonary Function in Patients with Chronic Obstructive Pulmonary Disease: A Cross Sectional Study”

Dear Chief Editor,

I, Linny Luciana, on behalf of my co-authors, would like to submit our original research article entitled “The Association between Diaphragmatic Thickness and Pulmonary Function in Patients with Chronic Obstructive Pulmonary Disease: A Cross Sectional Study” for consideration for publication in the Journal of Nepal Health Research Council.

This study investigates the relationship between diaphragmatic thickness measured by ultrasonography and pulmonary function parameters in patients with chronic obstructive pulmonary disease (COPD). Although diaphragm dysfunction is recognized as a contributing factor to respiratory impairment, evidence regarding its structural correlation with spirometric outcomes remains inconsistent.

Our findings indicate that diaphragmatic thickness does not significantly correlate with FEV₁/FVC ratio, predicted FEV₁, or FVC, highlighting the importance of multimodal assessment in COPD management.

There are

- No. of Figures/Images: 0
- No. of Table: 3
- Ethical approval letter: (No. 480/KEP/USU/2021)

Following are the documents attached herewith

- Authorship
- Declaration
- Manuscript “The Association between Diaphragmatic Thickness and Pulmonary Function in Patients with Chronic Obstructive Pulmonary Disease: A Cross Sectional Study”

Above document has been submitted in electronic and paper version (by post) to the JNHRC. If you have any questions or queries, you can write me at my email or call me at my phone number given below.

Please, acknowledge the received of this article to my email or contact address. Hoping for your kind co-operation in this regards.

Sincerely yours,

Name : Linny Luciana
