

## COVER LETTER

Date: 11-03-2026

Editor-in-Chief  
Pakistan Journal of Medical and Health Sciences

Dear Editor,

We would like to submit our manuscript entitled:

**“Hyperbaric Oxygen Therapy Reverses Periodontitis-Associated *Porphyromonas gingivalis*-Induced Cognitive Impairment in Sprague–Dawley Rats”**

for consideration as a **Research Article** in the *Pakistan Journal of Medical and Health Sciences*.

This study investigates the effect of hyperbaric oxygen therapy on cognitive impairment associated with *Porphyromonas gingivalis*-induced periodontitis using an experimental Sprague–Dawley rat model. The findings suggest that hyperbaric oxygen therapy may improve spatial working memory impairment related to neuroinflammatory mechanisms caused by chronic periodontal infection.

We confirm that this manuscript is original, has not been previously published, and is not currently under consideration for publication elsewhere. All authors have read and approved the final version of the manuscript and agree with its submission to the Pakistan Journal of Medical and Health Sciences.

Ethical approval for the animal experiment was obtained from the Institutional Animal Research Ethics Committee.

We believe that the findings of this study may contribute to better understanding the neurological consequences of chronic periodontal infection and the potential therapeutic role of hyperbaric oxygen therapy.

Thank you for considering our manuscript for publication. We look forward to your response.

Sincerely,
